May. 2024 — Present

- **Three-Step Nav: A Hierarchical Global-Local Planner for Zero-Shot Vision-and-Language Navigation**

- Proposed a hierarchical global-local framework that alternates between *looking forward* to sketch global plans, *looking now* for fine-grained local grounding, and *looking backward* to audit execution history.
- Designed an adaptive judge module equipped with meta-skills to detect navigation drift and trigger self-correction without task-specific fine-tuning.
- Achieved state-of-the-art zero-shot performance on R2R-CE and RxR-CE datasets, reducing navigation error by 15% and improving SPL by 12% on R2R-CE validation splits.
- One first-author paper accepted at AISTATS 2026 [2].

- **A Graphical Framework for Knowledge Exchange between Humans and Neural Networks**

- Proposed a pipeline for humans to directly interact with Neural Networks on a structural representation of visual concepts.
- Constructed Structural Concept Graphs (SCG), a reasoning logic mechanism of Neural Networks in classification tasks, using reasonable concepts extractor and Graph reasoning Network.
- Humans could make decisions on the SCG and use SCG to guide the original Neural Network backward by knowledge distillation.
- Accuracy increased by about 4% improvement on target ImageNet classes without a drop on the other classes.
- Submitted one primary-author paper [1].

- **ShARc: Shape and Appearance Recognition for Person Identification In-the-wild**

- Developed a multimodal framework that integrates the pose and shape encoder with the aggregate appearance encoder for robust person identification in uncontrolled environments.
- Achieved state-of-the-art results on public cloth-changing person re-identification datasets such as CCVID, MEVID, and BRIAR.
- Published one co-author paper on WACV 2024 [4].

- **GaitRef: Gait Recognition with Refined Sequential Skeletons Knowledge Exchange**

- Combined the silhouettes and skeletons information and refined the framewise joint predictions for gait recognition.
- On Gait3D, the proposed method outperformed the baseline by 6.1% on Rank-1 and 5.4% on Rank-5.
- Published one primary-author paper on IJCB 2023 (oral) [5].
